2. With respect to the rejection of claims 1, 3, 4, 6-8, 10-13, 16, 19 and 21 under 35 U.S.C. 103(a), it is submitted that claim 1 is allowable because the cited references do not disclose or suggest that the first and the second housing parts are arranged to move away from the third housing part by using said hinge mechanism before opening in said opened use position, and wherein the first and the second housing parts, when placed against each other, are arranged, upon closing in said closed use position, to be partly inserted in the third housing part by using said hinge mechanism to reduce the outer dimensions of the device.

Claim 25 is allowable because the cited references do not disclose or suggest that the CMT interface comprises an electronic display arranged on at least one of said two adjacent walls, and wherein said electronic display is arranged for presenting data and information to the user in the closed use position of the device.

Claims 3-12, 15, 16, 19, 20 and 21 are patentable at least by reason of their respective dependencies.

For all of the foregoing reasons, it is respectfully submitted that all of the claims now present in the application are clearly novel and patentable over the prior art of record, and are in proper form for allowance. Accordingly, favorable reconsideration and allowance is respectfully requested. Should any unresolved issues remain, the Examiner is invited to call Applicants' attorney at the telephone number indicated below.

The Commissioner is hereby authorized to charge payment for one additional independent claim (\$200.00) and any fees associated with this communication or credit any over payment to Deposit Account No. 16-1350.
